

# JANUARY 2023 NEWSLETTER

**Welcome to the January issue of the Advance Anti-Slip Surfaces newsletter.**

**At Advance Antislip, we know we're extremely fortunate to have your ongoing support. With that in mind, we'd like to wish you a Happy Lunar New Year for 2023. A time to share and celebrate this festive occasion all around the world. May the Year of the Rabbit bring good fortune, peace and prosperity for us all.**

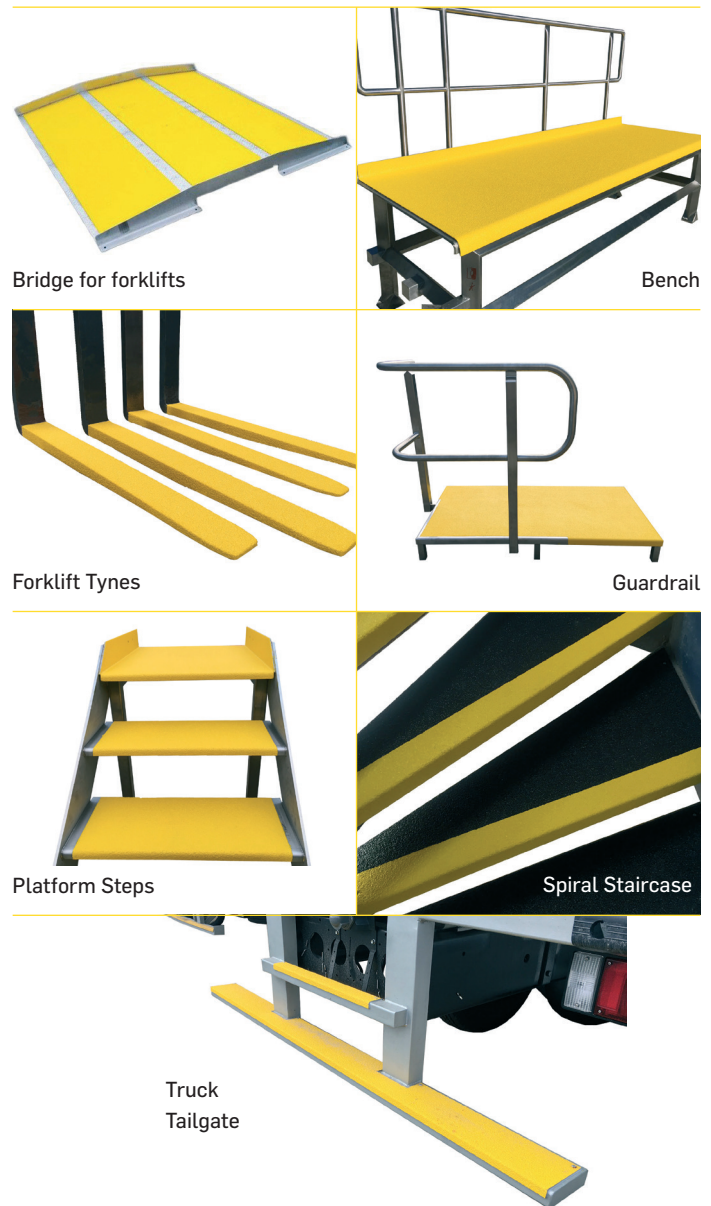

Apart from the thousands of regular stair nosings, ladder rung covers and Safeplates we make each week, we are frequently challenged to design and construct various bespoke solutions for our customers. Whether it's an item supplied by our customers for coating or something that we need to supply as a completely integrated unit, we will do our best to make every item slip resistant.

The Advance Anti-Slip proprietary method of manufacture means we are able to add our antislip coating to almost any object. From forklift tines to farm equipment, road plates to locomotive ladders, spiral stair cases to silo ladders, truck tail gate bars to pontoon jetties, and barges to bridges, you'll find our antislip product inconspicuously doing its job to keep pedestrians, workers and visitors safe.

Pictures of some of the many customised antislip elements we have supplied can be found on our website: <https://www.advanceantislip.com.au/gallery.htm>

**Let's prevent slips trips and falls on pedestrian walkways! Take care and stay safe over the coming months.**

**Here is an example of a few of the more unique orders we received last year.**

**Stair, step and landing safety is vital for every pedestrian access area. Advance Anti-Slip has non-slip elements to suit every situation.**
