Keeping the Mining Industry Safe, One Step at a Time

Unmatched Safety for the Toughest Conditions

In the mining industry, safety is paramount. Slips, trips, and falls remain leading causes of workplace accidents, especially in high-risk environments like mines. At Advance Anti-Slip Surfaces, we specialise in industrial-grade, metal-backed antislip solutions designed to withstand the harshest conditions while protecting your workforce.

Why Choose Advance Anti-Slip Surfaces for Mining Applications?

- **Engineered for Durability:** Our products are crafted to endure extreme conditions, from heavy machinery areas to slippery walkways and stairs. Made with metal-backing, they resist wear and corrosion even in the toughest mining environments.
- **Certified Slip Resistance:** Our antislip surfaces meet rigorous industry standards, ensuring optimal grip underfoot, whether in wet, oily, or dusty conditions. These surfaces are independently tested for high traction performance, giving you the confidence of compliance with safety regulations.
- **Quick Installation & Minimal Downtime:** Our products are easy to install, minimizing downtime in busy mining operations. They can be retrofitted to existing surfaces, making them versatile solutions that fit your needs without halting production.
- **Tailored Solutions:** Every mining site is unique, and we offer custom antislip solutions for all critical areas, from heavy traffic zones to stores loading docks. Our team works with you to assess needs and develop strategies to prevent incidents.

Applications in Mining:

- Loading Bays & Ramps
- Equipment Platforms
- Walkways & Stairs
- Heavy Machinery Access Areas
- Employee Pathways
- Washery and Preparation Areas

Protecting Your Workforce and Your Bottom Line

With Advance Anti-Slip Surfaces, you're not just investing in a product, but in a safer, more productive workplace. Every slip avoided is time saved and injury prevented, helping you meet safety benchmarks while keeping operations running smoothly.

Additional Features: Durability That Won't Quit – Built for Mining Environments

Our metal-backed antislip products are designed specifically for heavy-duty use in mining, handling high traffic, corrosive substances, and extreme temperatures with ease. With customizable solutions to match every unique surface, your workforce can safely navigate wet, oily, or dusty areas with confidence.

Reliable, Low-Maintenance Safety Investment

Engineered to reduce slips, trips, and falls, Advance Anti-Slip Surfaces is a cost-effective investment in reducing downtime, injury risks, and associated costs. Our antislip products are quick to install, eco-friendly, and require minimal maintenance – ensuring safety, productivity, and compliance in every area of your site.
